The focus of the study was on the classes of 2009 and 2012. The survey was distributed via standard mail and then followed up by telephone contact. The questions were designed to provide a perspective on the program as a whole while at the same time to give specific feedback to individual curricular areas. The data collected from the survey generally reflects positively our program at ORHS but also gives us potential areas to improve upon. It is the intent to conduct a survey of this kind every two years in the interest of ongoing program assessment and improvement.
